Shannon, Mrs Baillie and Dr Oloko

Scenario 1 Scenario 2 Scenario 3 GMC case notes More Guidance

What should the doctor do...? (Select A,B or C)

- A** Prescribe a low-dose tranquiliser and suggest Mrs Baillie waits a couple more days to see if Shannon's behaviour settles down?
- B** Ask Mrs Baillie's consent to carry out a physical examination of Shannon?
- C** Speak to Shannon to establish whether she

See why Dr Oloko needed to... out if... with her... Dr Oloko... not why. Dr Oloko, concluded... the capacity to make the... examination was a necessary... condition and, with Mrs Baillie... cause Shannon distress. She...

Reducing unnecessary investigations

Complaints to the GMC

Promoting clinical leadership

“Leadership is the most important influence on culture – every interaction by every leader in healthcare shapes the culture of their organisations”

Michael West, Senior Fellow, King’s Fund

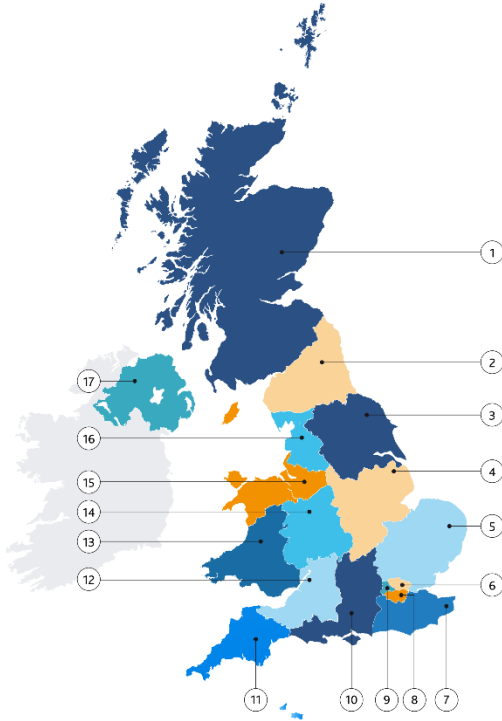

Supporting you on the front-line

Across the UK we are:

➤ **Engaging with 46,000 doctors per year**

➤ **86% say they will reflect on their practice**

➤ **75% say they will change it**

Supporting a sustainable medical workforce

Human Factors training to be rolled out for investigators

© Published 10 October 2018

All of the General Medical Council's fitness to practise decision makers, case examiners and clinical experts are to receive Human Factors training, and advice on modifying investigation processes, as part of a collaboration agreed with Oxford University's Patient Safety Academy.

We need your help to do more

1. Reform of the registration framework for non-EU qualified GPs and Specialists
2. Regulation of the Medical Associate Professions
3. Fundamental reform of the way Fitness to Practise Works

General
Medical
Council
